Did You Know? Fun Dental

Facts

1) Your teeth are as unique as snowflakes!

No two sets of teeth are the same - not even twins have identical teeth!

2) Reindeer teeth

Reindeer have 34 teeth, which is more than the 32 teeth that humans have.

Their incisor teeth are sharp and designed for cutting and tearing grass.

3) Teeth are the only part of your body that can't heal itself. While you can mend a broken or cracked bone back together — **you can't restore enamel.**

We only get 1 set of teeth, so its really important we take care of them!

What does a snowman say when they don't want to do something?
